## **Deluxe Track&Field coming in July for iOS, Android and MacOS**

Cologne, 02.07.2012 – **Deluxe Track & Field** is a retro style track and field game developed by Sunlight Interactive. One of the developers' biggest goals: to create an absolutely intuitive control system for the game's eleven events that can be played in a single player competition or together with friends, fighting for medals, records, high scores and achievements. In each event, **Deluxe Track & Field's** graphics combine retro camera angles with smooth animations.

**Deluxe Track & Field** will be released this coming July for iOS (optimized for the iPhone's Retina Display and the iPad's HD-Retina Display), Android and Mac OS.

To give all sports and game the chance to check out the high quality of **Deluxe Track & Field** themselves, Sunlight Interactive is going to release a free Lite Version of the game for all platforms.

Please find attached a first screenshot of **Deluxe Track & Field**.
