## **"Construction Playground" announced for Virtual Reality!**

**Cologne, October 28, 2019 – Today Sunlight Games announced the construction simulation called "Construction Playground", which will be exclusively released for virtual reality on PC. The game will soon be launched in Early Access on Steam, to give it the final touch and to include ideas from the community. In the game, the player can control different vehicles and machines on a construction site. Playing with VR glasses creates a special atmosphere.**

In the finished basic game, the player will be able to take control of a tower crane, tear down walls with two different hammers and build a new wall brick on brick. Missions will also be added. Later, the game can be expanded optionally with further DLC. Ideas for further DLC are e.g. a crawler excavator, a crawler crane and other vehicles / construction machines.

Marco Sowa-Israel from Sunlight Games: "Many of us dream of using construction machines or controlling a construction site. We want to bring this dream closer to the players with "Construction Playground". It is important for us to present the event as realistic as possible but fun and also to consider the wishes of the community. We also offer players the opportunity to select the game content themselves using DLC that will be published later."

First screenshots and further details will follow shortly!
