"Construction Playground": Steam page launched & feature list revealed!

Cologne, 19.11.2020 – Sunlight Games has launched the Steam page for the soon to be started Early Access of "Construction Playground" for Virtual Reality, featuring the first screenshots and a trailer. Additionally, a feature list has been released in the Steam forum of the game, that describes all features that are planned to be implemented during Early Access.

In the final basic game, players will be able to control a tower crane, tear down walls with two kinds of hammers and to build walls with individual bricks. Future DLC content will expand the construction site with new environments, missions and of course cool construction vehicles and tools, such as a crawler excavator and a crawler crane.

Sunlight Games is looking forward to adding ideas from the community to the game that are both meaningful and feasible.

For more information, please visit the Steam page of Construction Playground:
