"Construction Playground" gets Xmas update!

Cologne, 16.12.2020 – Today, Sunlight Games will release an Xmas update for "Construction Playground". The update brings huge quality improvements and includes a day/night mode as well as Xmas lights to the construction site. Additionally construction containers can now be moved with the crane. "Construction Playground" was released last week in Early Access on Steam for Virtual Reality.

In the final basic game, players will be able to control a tower crane, tear down walls with two kinds of hammers and to build walls with individual bricks. Future DLC content will expand the construction site with new environments, missions and of course cool construction vehicles and tools, such as a crawler excavator and a crawler crane.

Sunlight Games is looking forward to adding ideas from the community to the game that are both meaningful and feasible.

For more information, please visit the Steam page of Construction Playground:
