**Press Release 03/2021  
Cologne, January 29, 2021**

**"Construction Playground" gets major update today!**

**Cologne, 29.01.2021 – Sunlight Games will release today the major update for "Construction Playground". The update brings quality improvements, bug-fixes and adds new features. The most important new feature is the building of walls with new bricks and mortar. "Construction Playground" was released early December in Early Access on Steam for Virtual Reality.**

In the final basic game, players will be able to control a tower crane, tear down walls with two kinds of hammers and to build walls with individual bricks. Future DLC content will expand the construction site with new environments, missions and of course cool construction vehicles and tools, such as a crawler excavator and a crawler crane.

Sunlight Games is looking forward to adding ideas from the community to the game that are both meaningful and feasible.

For more information, please visit the Steam page of Construction Playground:
