**Press Release 04/2021  
Cologne, February 12, 2021**

**"Construction Playground" gets another update in Early Access!**

**Cologne, 12.02.2021 – Sunlight Games has announced another update for "Construction Playground" coming up shortly. The update brings improvements, bug-fixes and adds new features. The most important features are the "Over-Hook-Camera" on a display in the crane as well as the possibility to save the game. "Construction Playground" was released in early December in Early Access on Steam for Virtual Reality.**

In the final basic game, players will be able to control a tower crane, tear down walls with two kinds of hammers and to build walls with individual bricks. Future DLC content will expand the construction site with new environments, missions and of course cool construction vehicles and tools, such as a crawler excavator and a crawler crane.

Sunlight Games is looking forward to adding ideas from the community to the game that are both meaningful and feasible.

For more information, please visit the Steam page of Construction Playground:
